

Mapping digital photo serial numbers to days and events

073 to 141 - Sunday, practice race

146 to 167 - Monday, races 1 & 2

175 to 183 - Tuesday, race 3

185 to 207 - Tuesday afternoon, single handed race 1

210 to 238 - Wednesday, race 4

239 to 270 - Thursday? I guess, conditions look lighter than 238, races 5 & 6

271 to 289 - Thursday afternoon single handed & U12 races

301 to 311 - Friday? I guess, but why do these 10 look so much windier than the later ones?

317 to 472 - Friday, looks different conditions to 301, races 7 & 8

477 to 557 - Friday, prizegiving

So my guess is that it was too windy on Wednesday afternoon to hold Single Handed race 2 and U12 races. So these were postponed until Thursday. So there was no Single handed race 3 or fun race. This fits the race report of two days with only one race (but it's just a guess).
